## About this Site

This data is collected from the existing <https://www.canada.ca/en/analytics.html>, and reshaped into JSON data by a small python html extractor which can be used by the dashboard code built by 18F for the analytics.usa.gov site. We used this as a starting point for our own d3 based web analytics reports. The data shown here is for example purposes only. The data is not real-time, and should not be used for forecasting or any other purpose aside from visual layout potential. Thanks to all our friends both sides of the border. Open source inspires innovation.

This site is a alpha experiment by **CSPS.DIS**

## How we make it better

This data is one a small part of our web traffic. We need more trackers on more pages to make the data better! So if you are up to it [get involved](#). We want to get one amazing dataset and dashboard so we can give Canadians the content they want.
